top-load washers leading in

cleaning performance

three top-load wash systems deliver the power of Triple Action® technology

More motion means more cleaning action—these Triple Action® technologies deliver three separate wash motions for optimal cleaning performance.

EXCLUSIVE & Triple Action® Agitator (#23102, #22102)

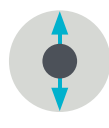

Moves in three directions for more cleaning action.

Base moves back and forth

Agitator moves clockwise

Agitator moves up and down

Triple Action® Impeller (#25102, #27102, #28102)

Delivers a gentle, high-efficiency clean using less water.

6 spray jets deliver a concentrated detergent blast

Impeller action

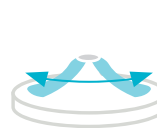

Wash basket action

EXCLUSIVE & Triple Action® Impeller (#25132)

All new design pushes clothes up and out for increased rollover and optimal cleaning performance.

9 spray jets deliver a concentrated detergent blast

Impeller action

Wash basket action

one-size-fits-all washing is a thing of the past, thanks to Smart Motion® technology

The Direct Drive Motor blends up to six different wash motions, providing customized care and cleaning to meet the needs of a variety of fabrics.

more top-load cycles and options

Using the UltraWash cycle makes this the best cleaning washing machine in its class.*

A powerful combination of water temperature, wash time, agitation and water amount make this the go to cycle for advanced cleaning performance.

Accela-Wash® technology cleans in 39 minutes.**

Activates a fast and powerful wash motion sequence to get clothes clean. Then, clothes go through a speedy rinse cycle using Jet Rinse which sprays water through clothes during high spin speeds for fast and effective rinsing.

8 loads without vs. 12 loads with

more loads in less time

Accela-Wash® technology gets clothes clean faster, allowing you to wash up to 4 more loads in the same amount of time.***

SALES TIP:

Explain that the Accela-Wash® option is automatically selected with the Normal/Casual cycle and can be added to these cycles as well:

Whitest Whites
Heavy Duty
Sanitize

Express Wash
Towels

water level – get control Deep Wash cycle

High-Efficiency washers are designed to get clothes clean using less water. However, there are times when members prefer a deep-water fill. Now this is available at the touch of a button. The Deep Wash cycle automatically adds more water to the tub for high-rinse efficiency.

* Among leading brands top load washers, 5.0 cu. ft. and larger. Based on AHAM cleaning score using 8 lb. load on heavy duty cycle.

** When washing an 8 lb. load on Normal cycle, default settings.

*** When washing an 8 lb. load in an 8 hour day when using Accela-Wash option.

front-load washers leading in

cleaning performance

custom wash motions for optimal clothing care thanks to

Smart Motion® technology

Heavily-soiled delicate fabrics, grass-stained jeans — no problem, thanks to this innovative cleaning technology. The Direct Drive Motor blends up to six different wash motions, providing customized care and cleaning to meet the needs of a variety of fabrics.

saturating
drives water and detergent through clothes

tumbling
evenly distributes load

swinging
delicate hand-wash effect

scrubbing
creates friction between garments

* With Accela-Wash feature activated washing an 8 lb. load on Normal cycle, default settings.

** Based on 4 common stains tested on Heavy Duty cycle with Steam Treat™ option.

more front-load features

Accela-Wash® feature on the default Normal cycle gets clothes clean in 29 minutes.*

The Accela-Wash® system combines Active Spray™ and Active Rinse™ nozzles to get loads cleaner, faster.

Active Spray™ nozzles

For a faster soaking time and a truly deep clean, dual spray nozzles in the front of the washer deliver a concentrated detergent solution directly onto clothes.

Active Rinse™ nozzles

Get fast, effective rinsing with a high-pressure nozzle above the door that sprays fine water particles through clothes during high spin speeds.

SALES TIP:

Explain that the Accela-Wash® option is automatically selected with the Normal/Casual cycle and can be added to these cycles as well:

Whitest Whites
Heavy Duty
Sanitize

Express Wash
Bulky
Comforter

keep it clean. keep it green. Cold Clean® cycle

Uses cold water to clean clothes as effectively as warm-water cycles, saving members even more energy and money. In fact, Cold Clean® cycle uses 49% less energy than Normal cycle.

for families on the go Stay Fresh® option

Periodically tumbles the wash load for up to 19 hours to help keep clothes smelling fresh and to help prevent wrinkles from setting in.

tough on stains Whitest Whites cycle

Bleach is automatically added to the wash cycle at the right time to keep whites looking their best.

perfect for active wear Workout Wear cycle

Designed to care for today's high-tech fabrics by using cooler temperatures and gentle wash motions so high-performance workout fabrics keep up with active families.

steam out stains with Steam Treat® option

Virtually eliminates the need to pre-treat stains and tackles common tough, set-in messes with the deep cleaning power of steam.** This option is tested to clean stains like syrup, coffee, juice and more.

nozzles in action

leading in drying performance

Kenmore® dryers bring innovation to your sales floor that take better care of clothes while drying them faster. From the intuitive brilliance of SmartDry technology to the power of Steam technology — all delivered in generous capacities — Kenmore brand packs a powerful punch when it comes to drying performance.

SALES TIP:

For the first time Kenmore brand has dryers that are ENERGY STAR® Qualified.

Point this out to members and explain that this rating means they will save money and resources with these models. (#6/71422/3 and #8/91582/3, #81592/3)

TOP LOAD

2-, 3- or 4-Point Sensing System SmartDry technology

Monitors moisture levels with sensor strips and regulates heat levels with temperature monitors to end the cycle when clothes are dry, saving members' clothes and resources.

- + Helps reduce shrinking so clothes last

SHOW & SELL

Take the time to explain the SmartDry technology point system to members. Make sure they understand they gain better clothing care as they step up the line.

more top-load and front-load cycles and options

TOP LOAD

EXCLUSIVE &

Heated Dryer Rack

This rack gently dries 3x faster than any other dryer rack. Specially designed to increase airflow, it's the perfect spot to dry tumble-free items like shoes, hats or stuffed animals, faster. (available on #7/67102)

TOP LOAD AND FRONT LOAD

Wrinkle Guard® option

This is another way Kenmore brand helps clothes keep that fresh, just-out-of-the-dryer look. After the cycle is over this is up and running to help prevent wrinkles from setting in. It tumbles clothes intermittently for 40, 90 or 150 minutes, depending on the model, after the cycle is complete.

TOP LOAD AND FRONT LOAD

Sanitize Dry cycle

Reaches temperatures high enough to eliminate 99.9% of common household bacteria. Sanitizes items like bedding and children's clothing without washing.

TOP LOAD AND FRONT LOAD

Check Vent Sensor

Helps keep dryer running safely and efficiently by alerting customers when the dryer is not moving enough air from the dryer to the outside.

Kenmore® exclusive

TOP LOAD AND FRONT LOAD

reduce odors, wrinkles and static cling SteamCare™ technology

Steam has the power to deliver ready-to-wear clothes straight from the dryer. Kenmore dryers provide steam through several cycles and options to keep clothes looking and smelling their fresh best.

Steam Refresh™ cycle

In just 20 minutes clothes are refreshed with steam technology which means fresh, dry, ready-to-wear clothes and less ironing.

Iron Ready™ option

Dampens clothes with a light injection of steam to make ironing easier and more efficient.

Static Shield™ option

Virtually eliminates static cling and the need for dryer sheets by adding steam to the load.

SALES TIP:

Hard water concerns? Remind members that the unique design of the SteamCare™ Dryer Cartridge allows them to fill the cartridges with bottled or filtered water. Do not use distilled water.

* Compared to dryers with SmartDry Technology.

** Compared to dryers with SmartDry and SmartDry Plus Technology.

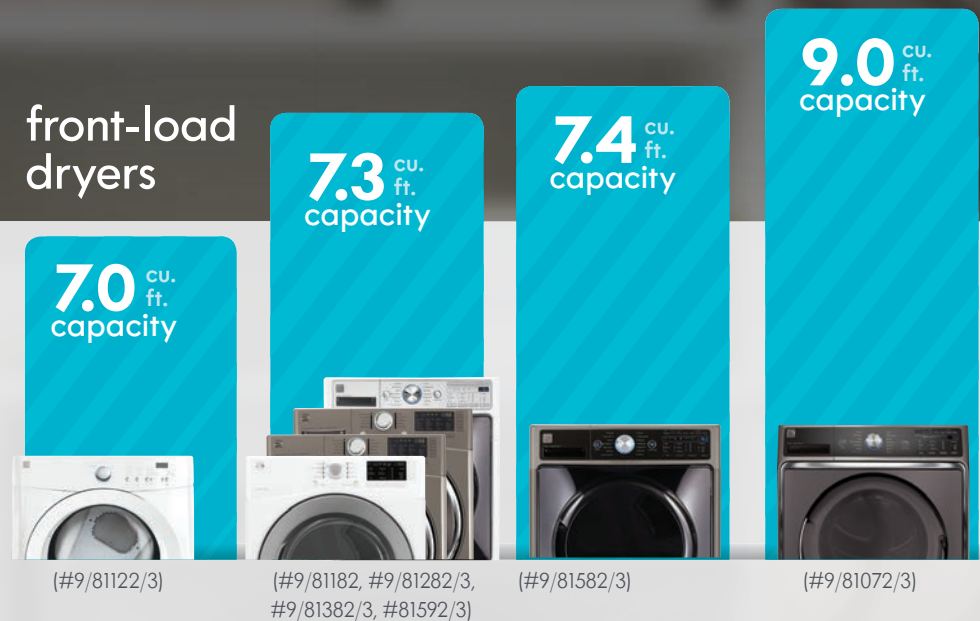

capacity

see how Kenmore brand delivers on this top consumer desire

front-load washers

front-load dryers

top-load washers

top-load dryers

loads to do? pile it on.

Kenmore brand offers generous capacities across both platforms in washers and dryers to wash and dry everything from extra large loads and bulky comforters to king size bedding.

more laundry convenience

Kenmore brand brings members a variety of great features that make any pair they choose – from either platform – an easy and efficient way to care for their clothes.

high-efficiency now comes in top load as well as front load

In the ten years since most members last purchased a new laundry pair, there have been great strides in efficiency in both top-load and front-load platforms. HE washers use low water wash systems to deliver a superior clean using less water. These washers are smart enough to sense each load to determine just how much water is needed to get the load clean without filling the tub completely.

why members need high-efficiency

high-efficiency = greater savings

High-efficiency models can save hundreds of dollars a year in water and energy. Plus, thanks to higher spin speeds, clothes are dryer at the end of the wash cycle saving drying time.

less water = concentrated cleaning

Both front-load and top-load high-efficiency washers deliver a superior wash while using less water because detergent is not diluted with excess water.

SHOW & SELL

Have members imagine washing their hands. Do they submerge them in a sink full of soapy water, no. They wash them with a little soap and a little water. This will help them visualize how it's possible to get a superior clean with less water in the wash.

what detergent is right for your members' washers?

Use this guide to help members understand that different washers require different detergent.

Top Load

Only Dual Action® Agitator model #20022 and Triple Action Agitator model #23102 use regular detergent.

HE Top Load

Why use HE detergent:

- Improved cleaning results
- Cleaner rinse
- Minimizes excess suds that can create longer cycle times

Front Load

more convenience

Save energy+ option

Add this option to select cycles to save up to 30% more energy, when compared to the normal cycle alone.*

Soft Close Lid

Won't slam shut thanks to hinges that allow for the lid to close gently and quietly. Plus the durable tempered glass makes it easy to see the washer in action.

Aqua Guard

Aqua Guard is a water-resistant coating that protects against moisture while making accidental spills easy to wipe clean.

Touch Controls

Just a light touch is all you need to activate these highly responsive controls.

Express Wash cycles

When members don't have time to wait, they can wash and dry a small load in less than an hour using the Express Wash and Express Dry cycles.

AirFlow™ Doorstop

The small, built-in magnet can be used to prop the door open to increase air circulation in the drum. This helps keep the washer fresh between loads.

* With Save Energy+ feature activated washing an 8 lb. load on default Normal cycle.

by the numbers

Show members how Kenmore® adds up to better performance.

SHOW & SELL

Take time to explain the benefits of the fast spin speeds found in Kenmore® laundry. The washer spins clothes at speeds as fast as 1,350 RPM, to extract more water than conventional agitator models. Clothes come out of the washer with less moisture, saving time and energy for increased efficiency.

Kenmore Elite® front-load washers
